BUT HE FIGHTS ON DESPITE U. S. SEIZURE OF THE HORNET.

Lee Christmas Is Still Trying to Take Ceiba Nicaragua Stops Land Invasion of Honduras More Desertions From Davila Washington's Attitude

TRUXILLO, Honduras, Jan. 22, by wireless to New Orleans. The Hornet is gone. She is in charge of United States bluejackets. Bonilla is practically a prisoner of the U. S. naval officers here and Lee Christmas, the American filibuster and real head of the present insurrection, is off in the direction of Ceiba, threatening that city. This is the situation to-night.

Plans for the capture of Ceiba will have to be revammed by the insurgents, who had counted on the Hornet to aid them in their attack on the town. In the last attack, January 14, the insurgents failed of victory by a narrow margin.

Indeed, if they had but known it the leaders could have slept in Ceiba that night. But the disappearance of the Hornet alarmed them and they withdrew to await a better opportunity.

After a consultation here last week, it was decided to take Ceiba from the landward side, but at the same time to bombard the city with the small guns of the former United States gunboat.

Lee Christmas was sent off with three hundred men and a "Jackass battery" to join the force which had carried on the assualt on the town on January 14, and which consisted of about the same number of riflemen, fairly well armed and officered to a large extent by American filibusters who came here with

The juncture of the two forces was to have been made at Nueva Armenia The Hornet was sent to that point with a band of insurgents just before her capture by the Tacoma

She returned here to get stores and more men and was to have carried the sea force of the expedition. Now these plans will all have to be changed. Bonilla; who is being closely watched by representatives of the Davila faction and the United States, hardly dares to leave his headquarters.

Intense resentment is felt here at the action of the Tacoma, and it is freely asserted that Bonilla is being used as a catspaw for big financial interests in New York and Washington. One result of the "arrest of the Hornet" has been to increase the number of desertions from the

Cavila armies. The deserters report that the Federal forces are in a bad way; that food is scarce and that they are not being paid; that munitions of war are falling low and

that "even the Generals are discouraged." Bonilla, tied up as he is, is reported to have communicated with Lee Christmas and is also said to have wired New Orleans adherents certain instructions regarding the forwarding of supplies, the plans for the receipt of which the capture of the Hornet rendered futile.

Bonilla, though depressed at the loss of his warship, is determined to push the revolution through to the end one way or

He says that when Ceiba and Puerto Cortes fall, as fail they will he believes, the United States will recognize his government as the de facto one and allow the insurrection to proceed without further interference.

With this belief he despatched messages to-day to Lee Christmas, who had already been informed of the action of Commander Davis, that more troops would be rushed to his aid in the attack on Ceiba, and

to his aid in the attack on Ceiba, and recruiting in and about Truxillo is being vigorously prosected.

The insurgents have little or no difficulty in securing men enough to handle the limited supply of arms they have. The mobilization of the insurgents at Neuva Armenia continues unabated according.

While the capture of the Hornet will temporarily retard the progress of the

They called the immigration people on the phone and told them of the case, but the boat went off with Domenica and the box, presumable.

The first effect of this cloth is similar.

"The first effect of this cloth is similar to that of a mirror; but by means of its viscous nature the prepared canvas, unlike the mirror, retains a facsimile of the image. The mirror represents objects faithfully, but retains none; our canvas reflects them no less faithfully, but retains them ali. This impression of the image is instantaneous.

"The canvas is then removed and deposited in a dark place. An hour later to that of a whimsical accomplishment of a whimsical fancy, also from Lytton's book, that of turning on the music from a universal stupply house, is the tel-harmonium, the ingenious device for switching on music. In "Looking Backward" Bellamy describes the ideal shop of the future-there being no officious clerks, but all purchases being made, all packages tied up all change counted and values estimated by mechanical aids Adding machines which can think faster and more accurately than man are now with us. Weighately than man are now with us.

he impression is dry, and you have a picture the more precious in that no art an imitate its truthfulness."

The genii imagined by De la Roche were fair predecessors of present day users of the camera.

Attely than man are now with us. Weighing and counting machines by which any commodity can be counted without the use of tabulated figures save, it is calculated, from 40 to 50 per cent. of time and labor over all old methods.

The slot machine has found innumerable usages, even to selling rootage stanges. Jules Verne is perhaps the past master prognosticator who has to his credit foretelling, in fictional guise, most inventions and achievements. The phrase "Around the World in Eighty Days" no longer sounds wildly improbable, nor does "Twenty Thousand Leagues Under the Sea." A trip to the moon such as the state of the water.

The slot machine has found innumerable usages, even to selling postage stamps, a use which has added much to public convenience without any additional expense for clerk hire. Machines can hand out insurance policies properly stamped and signed, can automatically sell cigars to a customer and hundreds of things requiring human manipulation twenty years ago. The bootblacking machines and quick lunch machines have never become propular on this side of the water.

REPORT OF STATE SUPERIN-TENDENT OF PUBLIC WORKS.

Falling Off in Tonnage Last Year Most of the Freight Carried Was Way Freight-Plea That Barge Canal Be Placed in Charge of a Commission

ALBANY, Jan. 22.—The retiring State Superintendent of Public Works, Freder-Superintendent of Public Works, Frederick C. Stevens, in his annual report to the Legislature shows that last year the State canals carried 3,073,412 tons, a falling off of 43,124 tons as compared with the previous year.

The report shows that, as in previous the bulk of the freight carried is makes easy the way of assimilation and keeps you healthy, hearty and happy.

years, the bulk of the freight carried is Restaurants. Saloons. represented by way freight, this being made up of 1,684,436 tons eastward bound and 583,796 tons west, making a total of 2,268,232 tons, as compared with 494,208 tons of through freight east and 310,972 tons through freight west, or a total of through freight, east and west, of 805,180 tons. The total tons of throug i freight carried on the canals showed a gain of about 40,000 tons over the through freight of 1909, the actual loss in canal tonnage from the previous year being in the way traffic. The through shipments were made up of 894,768 tons shipped west and 2,187,644 tons shipped east.

Supt. Stevens believes that the barge canal contractors should be able to continue their construction work from May 15 until June 1 and that the users of the canal should not be interfered with by the contractors from November 15 to December 1, when they are hurrying their goods to tidewater. He recom-mends legislation which would meet this situation. Mr. Stevens renews his recommendation

of contracts and carrying on the work and doing away with the present divided responsibility

interests Mr. Stevens believes that navigation on the Cavuga-Seneca Canal might be carried on to completion. He also refers to the constantly increas-

ing number of pleasure craft using the States Government on Federal waters.

SNOW SHOVELLING SERIAL.

Fight on a Roof, Fire Panic, Engine Upset -Blame the Janitress.

The janitress asked Louis Friedman, a salesman of 138 Graham avenue, Williamsburg, to shovel the snow from the roof yesterday. While so engaged he woke up Jacob Polerstock, a top floor tenant. As Polerstock poked his head through his bedroom window to scold the man on the roof, a mass of snow from Friedman's shovel struck him in the face.

Quickly putting on his clothes Polerstock rushed to the roof and attacked the salesman. Seeing the fight and wishing to attract the police, an Italian in a dwelling opposite shot off a revolver.

Other Italians shouted "Fight!"

thers thought it was "Fire!" and there was a rush to get out. In the panic many tenants fell and were trampled. A pedesrian ran to a drug store for a fire key and urned in an alarm. Engine 113 was among those which

responded. While it was making a short urn from Stagg street into Graham avenue to avoid a car the engine struck the curbstone and tipped over. The firemen were thrown unhurt into the snow. Firemen and policemen were directed

to the roof of 138. They found the two men still fighting. Both were badly cut and bruised and nearly exhausted. They were arrested and taken to the police were arrested and taken to the police of a station where a surgeon was busy for nearly an hour bandaging their injuries.

Then they were taken to the Manhattan Senator-elect William E. Chilton and station where a surgeon was busy for Then they were taken to the Manhattan avenue police court and arraigned before Magistrate O'Reilly.

"Judge," said Polerstock, "I was in a

Then they were taken to the Manhattan avenue police court and arraigned before Magistrate O'Reilly.

"Judge," said Polerstock, "I was in a fine dream when this man woke me with his snow shovel. I trued to tell him not to make so much noise, but he shovelled snow all over my face and then I made up my mind to beat rim."

Both men were held in \$300 bail for a hearing to-morrow.

KING GEORGE ECONOMICAL

Spends Less Than His Father and Keeps an Eye on the Bills.

LONDON, Jan. 11. - Tradesmen who have the privilege of supplying the wants of royalty are envied by their less favored competitors, and doubtless the coat of arms with the words "Purveyor to his Majesty the King," which appears on their shop fronts, is a tangible asset But King George's purveyors are already regretting the good old times, for the present sovereign is of an economical turn of mind and perquisites are not what they were.

The late King Edward's expenditure was on a more lavish scale than that of, his successor and his scrutiny of the accounts much less strict. King George's tailors bills are probably half of what King Edward's used to be in the year. The late King rarely wore the same suit of clothes more than half a dozen times that the barge canal construction work should be placed in charge of a commission having full control of the letting the royal wardrobe. The King does not order more than a dozen ordinary mornesponsibility. Without serious detriment to shipping these may be added about another half dozen suits for fishing, shooting and riding. The cost of the King's uniforms might well be closed for two seasons in of course amounts to a considerable sum, order that the construction work there but it is not treated as part of the King's personal expenditure and is paid by the keeper of the privy purse.
